A TIME FOR NOTIONAL CHANGE

Anyone who works with cloth understands that notions are small things--needles, pins, buttons, and the like. They know that these small things are essential to fashion the garment/item. Typically, the more carefully selected the notions, the finer the outcome.

In the more conceptual definition, notions are small, often disconnected thoughts. Small individually. Large and powerful cumulatively. The effects of conceptual notions shape lives and form the contours of behavior.

"Nothinal change" refers to the idea that small, disconnected thoughts and behavior are linked, Notional Change.
